

# The Sociopathic Business Model™

## DEFINITION

When corporations or the government pathologically engage in unethical & illegal behavior without shame, remorse, guilt or accountability. The illegal behavior is encouraged, replicated and rewarded. While those exposing the negative truthful information are demeaned, insulted, threatened, intimidated & ultimately terminated or eliminated.

When corporations or the government knowingly & willingly ignore employee sexism, racism, & retaliation claims, it is because they are engaged in far greater illegal activity that will harm more than just the protected classes.

## CHECKLIST

As employees, consumers, patients, taxpayers or shareholders if you've experienced three or more items on this checklist for longer than three months, start documenting. Exposing the negative truthful information of those pathologically engaged in unethical & illegal behavior harms the corporate/government image and image is tied to profits.

The goal of Forced Accountability occurs when victims of corporate/government abuse expose the negative truthful information BOTH publicly & legally which holds the pathologically abusive company/government accountable while creating positive, sustainable, societal change.
